

## Chocolate-Powered Racecar

Post by Jo

Wednesday, 10 March 2010 16:00

---

**Lola** is the first formula 3 racecar fueled by leftover chocolate (is there such a thing?) carrots, potato starch and flax. It has a top speed of 135 miles per hour and can go from zero to 60 in 2/5 seconds. It was created by England's University of Warwick as a blend of muscle and eco-friendliness and was retrofitted with renewable and sustainable materials. Read more at {
